SEWERS, PAVING, ETC. — Spain.—The civil governor of Barcelona has approved of an estimate of about $2,160,000 for the special or extraordinary municipal expenditure for the current year, the money to be expended on works of sewerage and paving, markets, and other works of improvement.

COAL MINING.—China.—George E. Anderson, U. S. Consul, at Amoy, report that it is announced that the leading merchants of Lungyen-chow, a city in Fo Kien Province, have organized a company and have secured permission from the Government at Peking to work coal and other mines in that vicinity.

RAILWAYS, ETC.—Egypt.—The Egyptian State Railway Administration, Cairo, purposes the laying of a second track on the lines Wasta Minieh, Zagazug-Tel-el-Kebir, and Koubbeh Margp; estimated cost, $3,500,000. $4,529,900 is to be expended for depot extensions, lighting plants, freight storage sheds, and other railroad improvements.

ELECTRIC RAILWAY.—Germany. — The municipalities of Frankfort and Offenbach have entered into an agreement for the construction of a double-track electric railroad between the two cities; it is also proposed to build an electric railway from Frankfort to Homburg, 12 miles, and eventually extend the line to Höchst.

RIVER IMPROVEMENT.—Italy.—The commission appointed by the Italian Government has submitted plans for the improvement of navigation on the river Po and auxiliary water courses. The estimated cost of the improvements is $23,600,000. The committee calculates that 48,500 HP. energy will be developed along the Po, which could be used for industrial enterprises, the annual rental of which would yield $300,000 to the Government.

IRON WORKS.—Italy.—Several iron works are to be erected at Naples in consequence of the privileges offered to new industrial undertakings establishing themselves at that place. The Ferriere Italiane is about to build a blast furnace, and the Milan Silvestri are building branch works for making railroad materials. Several textile factories are now going up, among them a cotton spinnery, with a working capital of $800,000, and a mill for spinning jute yarn, with a capital of $300,000.

RAILWAY.—Belgium.—The Belgian Government has sent to the Chamber of Deputies a project of law approving the convention concluded at Berlin Aug. 15, 1903, for improved railway communication between Belgium and Germany. The agreement calls for the construction of a direct line between Brussels and Aix la Chapelle. It is expected that the Chamber of Deputies will pass the bill authorizing the construction of proposed line. Immediately after the bill is passed work will be begun on the new road, the total cost of which is estimated at about 55,000,000 francs ($10, 15,000).

RAILROAD.—Ecuador.—Charles H. Moore, First Asst. Engineer of the Erie R. R., at 23 Cortlandt St., New York, has obtained a furlough and will sail for Guayaquil on July 20th, to go over and report for the Government of Ecuador on a proposed route for a railroad which is being surveyed from Ambato to a point on the Curaray River. Through erroneous information we implied that Mr. Moore had severed his connection with the Erie Railroad Co. and would sail on July 12, accompanied by Dr. R. S. Lavayen, Second Secretary of the Ecuadorian Legation. Mr. Moore will sail alone on July 20, his party having preceded him by several months.

PALACE, THEATER. — Panama. — Joseph W. J. Lee, U. S. Consul General at Panama City, Panama, reports that the Republic of Panama will receive bids until 2 p. m., Aug. 31, for the complete construction of Government Palace and National Theater in Panama City, according to plans executed by G. N. Ruggieri, C. E. The plans may be seen at the office of the Secretary of Public Works, Panama City. Further information may be obtained from the July 15 issue of the Daily Consular Reports of the Department of Commerce and Labor, a copy of which may be seen at the office of Engineering News, 220 Broadway, New York.

ELECTRIC PLANTS. — Italy. — Brioschi, Finzi & Co., of Milan, have applied for an appropriation of 700 liters of water per second from the Sermenza waterfall, District of Rimasco, for the production of power for traction and other industrial purposes, and for electric lighting. The cost of the hydraulic plant and generating machinery is estimated at about $320,000, and of the erection of the lines at about $24,000. The following concessions have been granted: By the Prefect of Como to Signor Francesco Valerio for an appropriation of 11 liters per second from the Valle di Villa waterfall, Lezzeno, for electric lighting; by the Prefect of Turin to Signor Nouchy Fedele for an appropriation of water for industrial purposes from the Santo Barthelemy waterfall, district of Nu

RAILWAY.—Colombia. — The Colombian Government has just assured the connection of its Capital, Bogotá, with Bahia Honda, on the Atlantic coast, by a railway 1,400 kilometers in extent, by means of which it will be possible to make the journey within three days; this railway will run through the most populous countries of the Republic. Bahia Honda is the most famous natural sheltered harbor on the Caribbean Sea, and a concession for it has been granted for 99 years to the railroad Company, as has also concessions for coal and oil mines, very abundant in that vicinity, and which are to be immediately explored; also healthy extensive wild lands of great fertility. The concessionary contractors are: Baron Fernand Raoul Schmatzer, of Paris, and Julio Patino, of London, for the section from Bogota to Bucaramanga (400 kilometers); and André Lefebvre, of Mexico, and Maurice Brochet, of the "Société Francaise des Ingénieurs Coloniaux," of Paris, for the section from Bahia Honda to Bucaramanga (1,000 kilometers). A high subvention and valuable privileges and franchises are granted to the enterprise by the government. The work is to be started at the beginning of next year. In a very near future a report and maps will be issued, and these, it is stated, will show the entire superiority of this scheme as compared with the other proposed projects.
